

Radiant Face Wash

Da Lua's Radiant Face Wash is a fresh and soothing face toner.

A toner is simply a fast-penetrating liquid product that is applied after cleansing to help **freshen and exfoliate the skin**. Toners are beneficial for skin because they help improve skin clarity, reduce pore size, and **remove residual oil and impurities**. This helps your skin absorb any serums or moisturizers you apply after your cleanser.

The use of an **apple cider vinegar** toner, specifically, helps to **tighten** the skin and **protect** it from harmful environmental elements. Raw apple cider vinegar makes a great face toner because it **balances the natural pH** of the skin and breaks up the bonds between dead skin cells to keep skin pores open. It also can diminish **wrinkles, sun, and age spots**, and improve acne and acne scars. It's also great for freshening and removing excess oils and make-up that may have been left behind after cleansing. Apple cider vinegar is antiseptic and antibacterial, which is an added bonus when dealing with skin infections and conditions like acne and eczema.

Ingredients

Organic rose, chamomile and lavender macerated in unpasteurised apple cider vinegar, rose hydrolat and distilled water. With tea tree and lavender essential oils

Dosage & Use

Shake well before each use, to combine the mixture and get a homogenous blend.

Apply the toner to your freshly washed* skin using a cotton ball or pad, avoiding the eye area. It can be used on its own, having previously washed one's face with water, or in combination with Da Lua's **Makeup Remover**. In which case the face wash is to be used after the moisturising effect of the Makeup Remover, for a balancing result and removing excess oils.
